

Product-Information

Tile-Clean - alcalic - Base and Maintenance Cleaner for Stoneware Tiles

Characteristics:	Special cleaner for all stoneware tiles for interior and exterior areas. Clears and removes heavy staining.
Chemical Action:	alcalic cleaning solution
Dosage:	<u>for thorough cleaning</u> Pure or up to 1:5 diluted with water
Application:	apply with spray machine or cleaning mop on dry or slightly damp surface and leave to soak for 20 minutes (depending on level of soiling and temperature). Spread with manual disc cleaner (with brush or cloth, depending on type of tiles). It is essential to suck up the dirt water immediately after cleaning. Afterwards rinse thoroughly with water. There need not be any residue of the product on the surface. Repeat process if heavy staining.
Dosage:	<u>for maintenance cleaning</u> up to 1:40 diluted with water
Application:	apply with cleaning mop on dry or slightly damp surface. On heavy duty floor tiles we recommend our floor Impregnator OFW or Secure for later impregnation.
Usage:	depends on level of staining
Notes:	all non-alcalic resistant surfaces must be protected before the treatment. Do not mix with other chemicals. Please follow the usual instructions when dealing with chemicals. Please read the security and processing advice on the EG-safety sheets.
Technical Data:	shelf life minimum 1 year sealed, store frost-protected pH-value 12 ingredients potassium hydroxide, nitrilotriacetate, silicates
Unit Size:	10 litre unit
Article No:	11021
